

About Us:

6 River Systems is disrupting a hundred billion dollar industry with a new approach to warehouse automation. Founded in 2015, we have developed a solution built on proprietary mobile robots and cloud-based enterprise software. Our solution is half the cost of traditional automation and 2-3x faster than manual, cart pick operations.

Culture:

Our culture is built on trust, smarts, and collaboration. We have a West Coast vibe with Northeast drive. As a team, we encourage open discussion about particularly challenging problems. We are as passionate about hiring the right people as we are about building great products.

Position Overview:

We are searching for an experienced designer who will be responsible for our integration to our customers' warehouse management systems (WMS). This individual will work closely with sales, solutions, engineering, product management, and deployment services to define the requirements and oversee the integration of our robotic fulfillment system.

This is an exciting opportunity to have a real impact on the success of our customers and help us accelerate the development of our automation platform. You will work across disciplinary lines on a small team, working with a very talented team. We guarantee you will be bragging about your job to friends and family on weekends.

Key Activities:

- Lead the discovery and documentation of customer integration requirements
- Assist sales with scoping the engagement during the pre-sales process
- Develop clear and concise materials for a technical-level audience
- Lead the integration efforts from pre-installation through post go-live handoff to the technical operations team
- Partner with engineering and product management to identify new product requirements and enhancements

Position Requirements:

- WMS product knowledge and hands-on WMS Implementation experience
- Domain knowledge of warehouse processes including receiving, putaway, picking, packing, shipping
- Experience with various database, integration, and messaging technologies (EDI, XML, JSON, EAI, etc.)
- Demonstrated ability to work in rapidly changing startup environment
- Strong customer facing skills
- Excellent written and oral communication skills; Organization and time management skills
- Undergraduate degree in engineering or science, Masters degree a plus.

Compensation:

The total compensation will be made up of industry-standard salary, bonus, and a significant equity position. We offer excellent benefits, work culture, and limitless career growth opportunities.

Location:

Position will be based at our headquarters in Waltham, MA

Travel:

Position will require 20-40% travel. Visits to prospect sites and existing customer sites throughout the region.
