

About Us:

6 River Systems is disrupting a hundred billion dollar industry with a new approach to warehouse automation. Founded in 2015, we have developed a solution built on proprietary mobile robots and cloud-based enterprise software. Our solution is half the cost of traditional automation and 2-3x faster than manual, cart pick operations.

Culture:

Our culture is built on trust, smarts, and collaboration. We have a West Coast vibe with Northeast drive. As a team, we encourage open discussion about particularly challenging problems. We are as passionate about hiring the right people as we are about building great products.

Position Overview:

We are searching for a quality assurance engineer to qualify new functionality before we upgrade and deploy our at customer sites. You will need to collaborate with the product and engineering team to create comprehensive test plans, and you will install, configure, and test 6 River software and hardware in multiple test environments. You will be both developing and executing on high level test plans.

This is an exciting opportunity to have a real impact on the development of our automation platform. You will work across disciplinary lines on a small team. We guarantee you will be bragging about your job to friends and family on weekends.

Key Activities:

- Full system and feature testing of our robots and software
- Involved with design team in scrum process
- Formulate and write comprehensive system and feature test plans.
- Install, configure and test software and hardware in multiple test environments
- Verifying bug fixes and regression testing
- Assist in providing remote support when needed to customers and deployment teams

Position Requirements:

- Analytical, technical and problem solving skills that can be applied to real world solutions
- Experience with scripting languages. Ability to write tools and scripts to automate repetitive tasks
- Working knowledge of Linux/Bash shell
- Understanding of relational databases and SQL querying tools
- General understanding of network topologies such as VPNs, firewalls, and routers
- Experience with ROS, Javascript and cloud based technologies a plus
- Not afraid of hardware: basic mechanical and electrical understanding
- Excellent written and oral communication skills; Organization and time management skills
- Ability to work in a fast paced, rapidly changing environment
- BS in a technical discipline

Compensation:

Competitive salary and equity. Excellent benefits and limitless career growth opportunities

Location:

Position will be based at our headquarters in Waltham, MA

Equal Opportunity Statement:

We are committed to creating a diverse environment and are proud to be an equal opportunity employer. All applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, age, or veteran status.
